

Alliance4Life

Alliance4Life_ACTIONS

With its new H2020 project, Alliance4Life expands to **twelve leading Life Science institutions** from eleven EU Member States located in **Central and Eastern Europe (CEE)**. In line with its mission, Alliance4Life aims to further contribute to **closing the divide in European health research and innovation (R&I)** during the next three years.

As **a source of good practices successfully piloted** during the previous phase, the Alliance4Life will build upon its results and impact achieved so far and convert its recommendations and strategies into actions:

- **Culture fostering excellence:** piloting peer-evaluation and assessment of institutional practice as a strategic management tool, professionalizing research administration;
- **Recognition and trust towards CEE:** attracting advanced partners to identified pockets of excellence, supporting scientific ideas originating in CEE, initiating new international projects and collaborations with industry;
- **Career policy nurturing talent:** training and networking next generation of leaders, upgrading institutional career systems;
- **Impact on innovation:** raising the competences of technology transfer specialists, creating industry relations platform linking academia and industry;
- **Spill-over effects:** sharing, inspiring, communicating with stakeholders and policy makers; using the established networks to gain advice, new collaborations, and EU-wide impact.

Alliance4Life Members:

- Masaryk University – CEITEC, Czech Republic
- St. Anne's University Hospital Brno – ICRC, Czech Republic
- Biomedical Research Center of the Slovak Academy of Sciences, Slovakia
- Medical University of Łódź, Poland
- University of Zagreb School of Medicine, Croatia
- University of Tartu, Estonia
- Vilnius University – Faculty of Medicine, Lithuania
- Latvian Institute of Organic Synthesis, Latvia
- University of Ljubljana, Slovenia
- Semmelweis University, Hungary
- Medical University Sofia, Bulgaria
- University of Medicine and Pharmacy "Carol Davila" Bucharest, Romania

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 964997.
